```
</style>
```
Like all tags, be sure to close using '/' before name

```
<body>  .....    </body>
```
The main content of your webpage between these

```
<h1>     .....    </h1>
<h2>     .....    </h2>
     .             .
     .             .
<h6>     .....    </h6>
```
<h1> to <h6> are for headings on your webpage. <h1> is largest, <h6> is smaller

```
<p>      ......   </p>
```
Paragraph

```
<br/>
```
New Line (break)

```
<a href="link"> link text/image </a>
```
Create a link to a web page

```
<img src="image.jpg"/>
```
Display an image, giving the tag a

```
<iframe width="420" height="315" src="video link address"
    frameborder="0" allowfullscreen="1">
</iframe>
```
Imbed a video

```
<ol>
    <li> item 1 </li>
    <li> item 2 </li>
</ol>
```
ordered list

list items

```
<ul>     ......   </ul>
```
unordered list

```
<table border="1">
    <thead>
        <tr>
            <th>Match</th>
            <th>Winner</th>
            <th>Score</th>
        </tr>
    </thead>

    <tr>
        <td>Manchester Unitred v Portsmouth</td>
        <td>Portsmouth</td>
        <td>0 - 13</td>
    </tr>
</table>
```
table with a border size
- anything in these tags will be a table heading
- start table row
- table heading name

- new table row

-table data (what appears in the box)

- don't forget to close the table ☺
